PROFESSIONAL SUMMARY

AWS and TOGAF 10 Certified Solutions Architect with 3+ years in banking tech, designing scalable, secure, and integrated financial technology solutions. Skilled at translating business needs into architecture designs and leveraging technology to deliver innovative, secure, scalable solutions that drive business growth.

EDUCATION

MSc. Computer Science (In Progress) University of Ghana	Expected Graduation: 2027
BSc. Actuarial Science Kwame Nkrumah University of Science and Technology	2021
Research Project: Credit Risk Management Using the C5.0 Decision Tree Algorithm	

CERTIFICATIONS

- TOGAF 10 Certified Practitioner** | The Open Group | April 2026
- AWS Certified Solutions Architect – Associate** | Amazon Web Services | July 2024
- Financial Modelling and Valuation Analyst** | Corporate Finance Institute, Canada | January 2023

TECHNICAL SKILLS

- Cloud & Infrastructure:** AWS (EC2, S3, IAM, RDS, Lambda), Terraform, Infrastructure as Code
- Architecture & Design:** Enterprise & Solution Architecture, Integration Design, UML, TOGAF 10 Framework (ADM, Architecture Governance), Requirements Engineering
- Product & Business Analysis:** Product Management, Stakeholder Management, User Research
- Tools:** Draw.io, PlantUML, Mermaid, Visme, Microsoft 365, Figma
- Soft Skills:** Cross-functional Collaboration, Project Leadership, Process Optimization

PROFESSIONAL EXPERIENCE

Technical Solutions Analyst (Solutions Architecture) Graduate Trainee Program <i>Stanbic Bank Ghana</i>	July 2024 – Present Dec 2022 – Dec 2024
- Pioneering member, Technical Solutions Team; Designed scalable digital banking solutions that seamlessly integrate with Finacle core banking systems, digital channels, and third-party APIs/services, reducing manual processes and errors by 30%. - Collaborated with cross-functional teams to translate business requirements into technical specifications and solutions that align with regulatory standards, enterprise architecture principles, and long-term business goals. - Developed 10+ comprehensive solution documents, architecture diagrams and product roadmaps, improving implementation clarity and reducing project delivery timelines by 15%. - Conducted market research, feasibility analysis and technology evaluations to identify cost optimization opportunities while ensuring performance, scalability, and security. - Increased technical productivity by 15% through the management of weekly cross-functional technical workstreams focused on bank-wide payment and collection solutions.	

- Rotated through 7 banking business units and partnered with business units and technology teams to identify process gaps and design technology solutions to bridge them, leading to a 20% improvement in efficiency.

Selected Project Experience

1. GhIPSS Request-to-Pay (RTP) API Integration & Channel Enablement

- Led end-to-end solution architecture for integrating the bank's digital channels with Ghana's national instant payment infrastructure, enabling real-time payment requests across 23+ licensed banks
- Defined API integration patterns, security architecture, and transaction flows across payment gateways, API orchestration layers, and core banking systems
- Designed a scalable channel architecture enabling payment capabilities to be extended across customer, merchant, and digital banking touchpoints through a centralised orchestration layer
- Produced full architecture deliverables including conceptual designs, integration patterns, security controls, sequence diagrams, and implementation roadmaps
- **Technologies:** RESTful APIs, IBM DataPower, API Orchestration (BlueBox), Finacle Core Banking

Business Value: Established the foundation for real-time interbank payment request capabilities, reduced future onboarding effort for additional channels through a reusable integration architecture, and improved payment ecosystem connectivity across the bank.

2. AI Chatbot and Salesforce Live Agent Integration

- Designed solution architecture for an AI chatbot integrated with a human agent escalation platform across the bank's website and mobile app.
- Designed a tiered service model where AI handles routine queries autonomously, escalating complex cases to human agents
- Reduced customer wait times by 20% through intelligent query routing and agent handoff automation
- **Technologies:** AI/ML APIs, Salesforce Live Agent, API Gateway

Business Value: Improved customer service efficiency while reducing agent workload, enabling agents to focus on complex requests

3. E-Cash Creation and Liquidation Automation for Telecom Clients

- Designed integration solutions for two telecom clients to automate e-cash withdrawals and account funding from trust accounts held with the bank
- Assessed each client's technical constraints individually, recommending tailored solutions: API-based for one client and SFTP-based with MT940 bank statement delivery for the other
- Produced comprehensive solution architecture documentation including conceptual architecture diagrams, functional specifications, security controls, and operational process flows.
- **Technologies:** REST APIs, SFTP, MT940 Swift Standards, Finacle Core Banking

Business Value: Reduced transaction turnaround times by 15-20% for both clients, expanded digital withdrawal and funds transfer capabilities for Telecel and MTN customers and agents, and strengthened payment interoperability between telecom and banking ecosystems.

4. Direct Debit Mandate Management

- Led solution design for a mandate management platform integrating the bank's internal systems with the national payment authority's mandate exchange infrastructure
- Designed API-led integration architecture connecting customer self-service portals, an API orchestration layer, notification services, and external payment ecosystem participants
- Defined security and identity management architecture including JWT-based authentication and role-based access controls

- Produced architecture deliverables covering integration patterns, process flows, security requirements, and deployment considerations
- **Technologies:** RESTful APIs, IBM DataPower, Finacle

Business Value: Streamlined mandate management and approval processes, improved integration with national payment infrastructure, and created a scalable and reusable platform for future direct debit and mandate-related services.

Risk and Compliance Officer

Oct 2021 – Sept 2022

Enterprise Trustees LTD

- Evaluated technology-enabled business processes across 7 departments, recommending risk mitigation strategies aligned with enterprise systems and operational goals.

LEADERSHIP & COMMUNITY

Project Lead | Standard Bank Group Hackathon

Sept 2023

- Managed team to develop a platform ecosystem solution that streamlines business operations, allowing small businesses in Africa to cater to Finance, Marketing, Sales and Delivery through one application and increasing brand visibility for small businesses across Africa by up to 50%.
- Documented technical specifications and designed and prototyped user-friendly interfaces for the proposed solution using Figma.
- Led the team to present this project to technology leaders in Standard Bank, South Africa.

Career Mentor | Because She Can Programme

2026 – Present

- Mentoring women transitioning into technology careers, with a focus on cloud computing and solutions architecture
- Providing guidance on certifications, career positioning, and breaking into the tech industry.

INTERESTS & LANGUAGES

- **Interests:** Finance, Cloud Computing, Writing short stories, Reading
- **Languages:** English and Twi, Beginner French
